**Financial Hardship Changes Over Time**

**ALICE** is an acronym for *Asset Limited, Income Constrained, Employed* — households that earn more than the Federal Poverty Level, but less than the basic cost of living for the county (the ALICE Threshold). Households below the ALICE Threshold — ALICE households plus those in poverty — can’t afford the essentials.

In 2022, financial hardship in the National Capital Area continued to be shaped by the conflicting economic forces of the pandemic and remained substantially undercounted by official measures.

These powerful crosscurrents — COVID-19, inflation, wage growth, and the expansion and expiration of pandemic public assistance — impacted how many households in the National Capital Area were below the ALICE Threshold of Financial Survival.

Between 2021 and 2022, the number of households in poverty in the National Capital Area decreased by 16,062 (up to 8% of all households). Yet the number of ALICE households increased by 52,322 (up to 26% of all households). In 2022, of the 2,051,380 households in the National Capital Area, 700,971 – 34% – were below the ALICE Threshold.

With the latest data from the American Community Survey (2022), the U.S. Census Bureau’s Household Pulse Survey (2023), and the Federal Reserve Board’s Survey of Household Economics and Decision-making (SHED) (2022), this report highlights the conflicting forces that continue to present opportunities for, and barriers to, financial stability in the National Capital Area.

The Cost of Basics Outpaces Wages

The Household Survival Budget reflects the minimum cost to live and work in the modern economy and includes housing, childcare, food, transportation, health care, a smartphone plan, and taxes. It does not include savings for emergencies or future goals like college or retirement. The Household Survival Budget is calculated at the county level and varies by household composition, as costs can vary greatly depending on location and household needs.

In 2022, household costs in the National Capital Area were well above the Federal Poverty Level of $13,590 for a single adult and $27,750 for a family of four.

Financial Hardship is Not Evenly Distributed

Groups with the largest number of households below the ALICE Threshold tend to also be the largest demographic groups. However, when looking at the percentage of each group that is below the ALICE Threshold, some groups are more likely to be ALICE than others.

By addressing the disparities in financial hardship by county demographics, community members can move toward more equitable solutions.
